Curriculum

At Babies & Buddies our programme is planned based on **individual interests**, strengths and needs as identified through child observations and discussions. Babies & Buddies uses the principles of the New Zealand National Early Childhood Curriculum, Te Whāriki, to enhance and guide our observations and activities.

Portfolios

We develop a **portfolio** for each child which includes individual observations, planning for future learning and records excursions, special events and individual milestones for the child

Trips and Excursions

At Babies & Buddies we plan for a whole Centre **excursion** four times per year. We also plan trips to meet the needs of individual age groups. We believe that children are **empowered to learn** through providing them with many different experiences

Food & Nutrition

At Babies & Buddies we have our in-house cook who provides **nutritionally balanced** breakfasts, lunches and afternoon teas.

Babies & Buddies has a strong **family focus**.

Babies & Buddies is a well established centre and provides **quality education** and care for children.

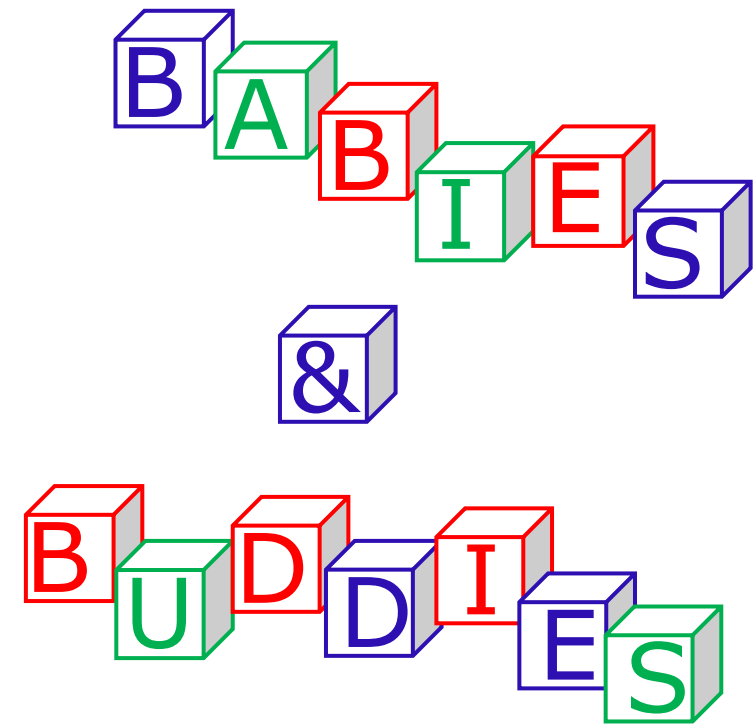

Children are offered an **attractive environment** filled with **quality resources** enabling them to explore, experiment, discover and create

We have a **high adult to child ratio**, our knowledgeable and nurturing teachers are experienced and qualified or currently in training.

We also offer a very **successful extension programme** for older children which supports them to acquire the skills needed to settle easily into school

“To develop the inner spark in every child so they shine on the outside”
